

IN THE CLAIMS:

Please amend the claims pursuant to 37 C.F.R. §1.121 as follows (see the accompanying "marked up" version pursuant to §1.121):

*Sub
C1*

1. (Twice Amended) An absorbent article comprising:
a main body including a liquid-pervious top sheet, a back sheet and an
absorbent core sandwiched between the top sheet and the back sheet;
B1
a layer containing a skin-protective ingredient; and
a support layer for covering the layer containing the skin-protective
ingredient, and the support layer being provided on a surface of the main body to be
in contact with skin of a wearer, wherein;
the solubility in water of the support layer is promoted at 25°C or higher,
and/or the moisture absorbability or the solubility in water of the support layer is
promoted at a relative humidity of at least 30 %.

*Sub
C2*

3. (Twice Amended) The absorbent article as set forth in claim 1,
B2
wherein the layer containing the skin-protective ingredient is formed of a
compound capable of forming an oily film on the skin of the wearer.

*Sub
D1*

4. (Amended) The absorbent article as set forth in claim 3,
wherein the layer containing the skin-protective ingredient can be fluidized
at 35°C or higher.

5. (Twice Amended) The absorbent article as set forth in claim 3,
wherein the layer containing the skin-protective ingredient is formed of at
least one compound selected from the group consisting of liquid polyisoprene,
squalane, pristane, ozocerite, ceresine, microcrystalline wax, polyethylene powder,
liquid paraffin, petroleum jelly, and paraffin.
6. (Amended) The absorbent article as set forth in claim 1,
wherein the layer containing the skin-protective ingredient and the support
layer are located on a surface of the top sheet.
7. (Twice Amended) The absorbent article as set forth in claim 1,
which further includes at least one of a leak-preventive cuff for preventing
side leakage and a leg cuff for preventing leakage through the area around the
wearer's thighs, and at least one of the leak-preventive cuff and the leg cuff are
located between the top sheet and the layer containing the skin-protective ingredient
and the support layer.
